2. Of plants, esp. of grass: Succulent and luxuriant in growth.

The literary currency of this sense (which seems still to exist in s. w. dialects) is due to the recollection of the instance in Shaks. (quot. 1610). A conjecture of Theobald's, adopted by Johnson and many later editors, substituted 'lush woodbine' (*metri gr.*) for 'luscious woodbine' in *Mids. N. n. i.* 251. The conjecture is now discredited, but the passage as emended has had many echoes in 19th c. literature.

Lushington (lʊʃɪŋtən), *slang.* [Punning use of the surname *Lushington*, with allusion to LUSH 2.]

The 'City of Lushington' was the name of a convivial society (consisting chiefly of actors) which met at the Harp Tavern, Russell Street, until about 1895. It had a 'Lord Mayor' and four 'aldermen', presiding over 'wards' called Juniper, Poverty, Lunacy, and Suicide. On the admission of a new member, the 'Lord Mayor' (of late years at least) harangued him on the evils of excess in drink. The 'City' claimed to have existed for 150 years; if this claim be well-founded, the existence of LUSH 2 will be authenticated for a date considerably earlier than that of our first quot. Our information is from 'Sir' B. Davies, the last 'Lord Mayor of Lushington.'

Now chiefly applied to doctrinal views held by Luther in opposition to other reformers, e.g. his doctrine as to the nature of Christ's presence in the Eucharist (see CONSUBSTANTIATION), and as the appellation of those churches, principally in Germany and Scandinavia, which accept the Augsburg Confession as their official doctrinal symbol.

-ly, *suffix* 1 (Forms: 1 -lic, -lic, 2-5 -liche, 4-5 -liche, 3-5 north. -lik(e), (3 *Orm.* -lic, -li3, -like), 3-6 -li, 4- -ly), appended to sbs. and adjs. to form adjs., represents the OE. *-lic*, corresponding to OFris., OS. *-lik* (Du. *-lijk*), OHG. *-lik* (MHG. *-lich*, mod.G. *-lich*), ON. *-lig-r*, *-leg-r* (Sw., Da. *-lig*), Goth. *-leik-s*;—OTent. *-liko*-. The phonology of the OE. form, as also of the mod.G. and the ON. forms, is somewhat abnormal, the frequency in use of the suffix having caused loss of the original secondary stress, with consequent shortening of the vowel, and in ON. also voicing of the gntural. A further irregularity appears in the phonetic development in ME. The normal representation of OE. *-lic* was *-lik* in northern dialects and *-lich* in southern dialects. These forms are found as late as the 15th century; but the form *-li*, *-ly*, which (though parallel with the reduction of OE. *ic* to *i*, and of ME. *everich* to *every*) seems to be chiefly due to the influence of the Scandinavian *-lig*-, occurs in northern and mid-land dialects as early as the 13th c., and before the end of the 15th c. had become universal. In the *Ormulum* (c 1200) *-lic* (rarely *-like*) is used before a vowel and at the end of a line, and *-li* before a cons.; the inflected form *-like* (disyllabic) seems often to be used, for metrical reasons, where grammar would require the uninflected form. In the comparative and superlative (OE. *-licra*, *-licost*) the ME. form had regularly *-li* according to phonetic law in all dialects (in the south the usual 13-14th c. form was *-lukere*, *-lokere*); but where the positive had the form *-li* new comparatives and superlatives in *-lier*, *-liest* were regularly formed from it.

The original Teut. adjs. in *-liko*- were compounds of the sb. **likom* 'appearance, form, body' (see *LICH*). Thus **mannliko*- ('manly') means etymologically 'having the appearance or form of a man'; **gōdliko*- ('goodly') 'having a good appearance or form', or 'having the appearance or form of what is good'. The primitive force of the suffix may therefore be rendered by 'having the appearance or form indicated by the first element of the word'; but while in the historical Teut. langs. it has remained capable of expressing this meaning, it has in all of them acquired a much wider application.

When appended to sbs., the most general senses of the suffix in all Teut. langs. are 'having the qualities appropriate to', 'characteristic of', 'befitting'. In English of all periods it has been a prolific formative; the adjs. formed with it are most frequently eulogistic, as in *kingly*, *knighly*, *masterly*, *princely*, *queenly*, *scholarly*, *soldierly* (cf. *manly*, *womanly* with *mannish*, *womanish*); among the examples with dyslogistic sense are *beastly*, *beggarly*, *cowardly*, *dastardly*, *rascally*.

ruffianly, scoundrelly. In OE., as in other Teut. langs., the suffix had often the sense 'of or pertaining to'; but the adjs. have, so far as this meaning is concerned, been to a great extent superseded by synonyms of Latin or Romanic etymology. Thus *manly* formerly admitted of the senses now expressed by *human* and *masculine*; for one of the older senses of *timely* we must now say *temporal*. Another use of the suffix, common to English with other Teut. langs., is to form adjs. denoting periodic recurrence, as *daily, hourly, monthly, nightly, weekly, yearly*.

When *-ly* is appended to an adj., the resulting derivative adj. often connotes a quality related to or resembling that expressed by its primary; cf., e.g., OE. *leof* 'dear' with *leoflic* 'lovely' (or, as it might be rendered, 'such as becomes dear'). The diminutive sense found in mod.G. *gelblich* 'yellowish', *süsslich* 'sweetish', though a very easy development from the original sense of the suffix, does not seem ever to have existed in English. Even in OE. *-lic* had app. ceased to be used in new formations from adjs.; the new adjs. f. adj. + *-ly* that have arisen in ME. or in mod.E. seem to be from the advs.

-ly, suffix ² (Forms: 1-2 *-lice*, 2-5 *-liche*, 4-5 *-lich*, 3-5 *-lyth*, -like, (3 *Ornu.* -like, -liþ), 3-6 -li, 4- *-lyth*), forming adverbs, represents OE. *-lice*, corresponding (functionally if not morphologically) to OFris. *-like*, OS. *-liko* (M.Du. *-like*, Dn. *-lijk*, MLG. *-like*, mod.LG. *-lik*), OHG. *-lich* (MHG. *-liche*, mod.G. *-lich*), ON. *-liga*, -lega (MSw. *-lika*, -leka, in mod.Sw. superseded by *-ligt*, -ligen; Da. *-lig*), Goth. *-leikþ*, derived from *-lika* (see *-ly* 1) with an adverb-forming suffix, OE. *-ð*, according to some repr. the ending of the abl. fem. (pre-Teut. *-ād*) or neut. (pre-Teut. *-ād*); according to others that of the instrumental neut. (pre-Teut. *-ām*).

The form-history of the suffix in Eng. is similar to that of *-ly* 1: in ME. the OE. *-lice* was normally represented by *-liche* (southern), *-like* (northern), the compar. being *-liker*, *-liker*, *-liker* (superl. *-est*).

The form *-li, -ly*, which was current in East Midland English in the 14th c., and became general in the 15th c., is probably due to the influence of the ON. *-liga*. In the strongly Scandinavianized dialect of the *Ornum* (c.1200) *-liz* and *-like* are used indifferently, according to the requirements of the metre. Where the positive ended in *-li, -ly*, the comparative and superlative ended in *-lier, -liest*. In the 15-17th c. forms like *falslyer, traitorouslyer* (Malory), *softlier, justlier, widerlier* (Long Barclay's *Argenis* 1625), *quicker, -est* (R. Baxter *Saving Faith* 1658) were common, but in later use the advs. in *-ly* are compared with *more, most*, the inflexional forms being only employed in poetry or for rhetorical effect.

In OE. *-ly* with this suffix must have implied the existence of an adj. with the suffix corresponding to *-ly* 1. In OE., however, there are several instances (e.g. *beadlic* 'boldly', *swellic* 'sweetly') in which an adv. in *-lice* has been formed directly from a simple adj. without the intervention of an adj. in *-lic*. In ME. the number of these direct formations was greatly increased, and when the final *-e*, which was the original OE. adverb-making suffix, ceased to be pronounced, it became usual to append *-ly* to an adj. as the regular mode of forming an adv. of manner. It was, down to the 17th c., somewhat frequently attached, with this function, even to adjs. in *-ly*, as *earlyly, goddily, kindly, lively, lovely, stately*; but these formations are now generally avoided as awkward, while on the other hand it is felt to be ungraceful to use words like *godly, goodly, lovely, mannerly, timely*, as advs.; the difficulty is usually evaded by recourse to some periphrastic form of expression. In examples belonging to the 16th and 17th c. it is sometimes difficult to determine whether a writer intended the adv. *godly* to mean 'in a good manner' or 'in a goodly manner', and there are other instances of similar ambiguity. In the words denoting periodical recurrence, as *daily, hourly*, the adj. and the adv. are now identical in form. A solitary example of an adv. f. sb. + *-ly* 2 with no related adj. is *partly*. From the early part of the 16th c. the suffix has been added to ordinal numerals to form advs. denoting serial position, as *firstly, secondly, thirdly*, etc. (cf. F. *premièrement*, etc.).

When *-ly* is attached to a disyllabic or polysyllabic adj. in *-le*, the word is contracted, as in *ably, doubly, singly, simply*; contractions of this kind occur already in the 14th c., but examples of the

uncontracted forms (e.g. *doublely*) are found as late as the 17th c. *Whole* + *-ly* becomes *wholly*, but in all other similar instances the written *e* is retained before the suffix, e.g. in *palely, vilely, puerilely*. Adjs. ending graphically with *ll* lose one *l* before *-ly*, as in *fully* (in southern Eng. commonly pronounced with a single *l*, but in Scotland often with double or long *l*, *duilly* (dʊˈli), *coolly* (kəˈli)). Adjs. of more than one syll. ending in *y* change *y* to *i* before *-ly*, as in *merrily*; in formations from monosyllabic adjs. the usage varies, e.g. *dryly, drily*; *gayly, gaily* (cf. *daily*, which is the only current form); *stily, silily* (but always *skily*); *greyly, grayly* has always *y*. Another orthographical point is the dropping of the *e* in the two words *duly, truly*. It is unusual to append *-ly* to an adj. in *-ic*; the ending of the adv. is nearly always *-ically*, even when the only current form of the adj. ends in *-ic*.

Lynch law. Orig. U. S. In early use **Lynch's** (Lynch's) law. The practice of inflicting summary punishment upon an offender, by a self-constituted court armed with no legal authority; it is now limited to the summary execution of one charged with some flagrant offence.

Now most commonly written *lynch-law* or *lynch law*, though the capital L is still often used.

The origin of the expression has not been determined. It is often asserted to have arisen from the proceedings of Charles Lynch, a justice of the peace in Virginia, who in 1782 was indemnified by an act of the Virginia Assembly for having illegally fined and imprisoned certain Tories in 1780. But Mr. Albert Matthews informs us that no evidence has been adduced to show that Charles Lynch was ever concerned in acts such as those which from 1817 onward were designated as 'Lynch's law'. It is possible that the perpetrators of these acts may have claimed that in the infliction of punishments not sanctioned by the laws of the country they were following the example of Lynch, which had been justified by the act of indemnity; or there may have been some other man of this name who was a ring-leader in such proceedings. Some have conjectured that the term is derived from the name of Lynche's Creek, in South Carolina, which is known to have been in 1768 a meeting-place of the 'Regulators', a band of men whose professed object was to supply the want of regular administration of criminal justice in the Carolinas, and who committed many acts of violence on those suspected of 'Toryism'.

1817 S. ROANE in W. Wirt *Life P. Henry* (1818) 372 In the year 1799, there were many suits on the south side of the James river, for inflicting Lynch's law. 1819 W. FAUX *Diary* 29 Nov. in *Memor. Days in Amer.* (1823) 304 The people [of Princeton, Indiana]... deputed four persons to inform him, that unless he quitted the town and state immediately, he should receive Lynch's law, that is, a whipping in the woods. 1828 J. HALL *Lett. fr. West* 291 No commentator has taken any notice of Lynch's Law, which was once the *lex loci* of the frontiers. 1835 W. IRVING *Our Prairies* 41 'Lynch's law', as it is technically termed, in which the plaintiff is apt to be witness, jury, judge, and executioner. 1839 STONEHOUSE *Axholme* 112 The burning Reading's house was... a terrible example of what the Americans term lynch law. 1879 FARRAR *St. Paul* I. 570 They seized the opportunity of executing a little Lynch law. 1888 BRYCE *Amer. Commun.* III. 399 Lynch law, however shocking it may seem to Europeans, is far removed from arbitrary violence.

So **Lynch-court** *notice-wd.*, a self-constituted tribunal for exercising lynch law. Judge Lynch, the imaginary authority from whom the sentences of lynch law are judicially said to proceed.

M.

M (em), the thirteenth letter of the modern and twelfth of the ancient Roman alphabet, represents historically the Greek *mū* and the Semitic *mēm*. The Phœnician form of the letter is *𐤌*, whence the early Gr. and L. *μ*, *m*. Its phonetic value has varied little; in Eng. it has always expressed what was doubtless its original sound, that of the bilabial nasal consonant, which is normally voiced, though when it is followed by an unvoiced consonant it has an unvoiced ending. Like the other nasals, *m* is capable of being used as a sonant or vowel, denoted by ('m) in the phonetic notation here employed; but in Eng. this occurs only after *ð* and *z* at the end of words (of Gr. etymology), as *rhythm*, *spasm*, *schism*, and the suffix *-ism*; in these words many speakers substitute (-om). The letter is never silent, exc. initially before *n* in Gr. derivatives, as *mnemonic*.

|| **Macabre** (makā'br), *a.* Also 5 **Macabrees**, 7 **Macabray**, 9 **Macaber**. [The form now usual represents *F. macabre*, an error for *OF. macabré*, whence the earlier Eng. forms.]

The *OF.* word occurs first in Jean le Fèvre's *Respit de la Mort* (1376), where the author, if he be correctly interpreted by M. Gaston Paris (*Romania* XXIV. 131), claims to have written a work called *la danse Macabré*. The etymology of the word is obscure; so far as its form is concerned it might be a popular corruption of *OF. Macabé* = Macabaeus (an example of 'Judas Macabré' has been found), and in the 15th c. the 'Danse of Death' was called *chora Macabaeorum* in Latin (Du Cange cites a Besançon document of 1453), and *Makkabaisdans* in Du. Macadamize (mākādāmōizē), *v.* Also M'Adamise, -ize. [f. MACADAM + -IZE.]

1. *trans.* To make or repair (a road) according to J. L. M'Adam's system, which consists in laying down successive layers of stone broken into pieces of nearly uniform size, each layer being allowed to consolidate under the pressure of ordinary wheel traffic before the next is laid upon it.

See M'Adam's pamphlet, *Remarks on the Present System of Road-Making* (ed. 5, 1822). He did not approve of the placing of any kind of foundation under the layers of stone, of the use of sand or gravel as 'binding' material, or of the smoothing of the surface by heavy rollers; though the name of 'macadamizing' is now often given to methods in which some or all of these practices are admitted.

Macute (mākūt). Also 8 *macutta*, *macoute*, *macoute*, 8-9 *macuta*. [ad. native African *macuta*.] At the beginning of the 18th c., said to be the name for one of the pieces of cloth used as money by the negroes of the Congo. Subsequently used in the W. African trade as the name for a money of account (= 2000 cowries), and hence adopted by the Portuguese at Angola as a denomination in their local coinage (= 50 reis); the Sierra Leone Company also issued (1791-1805) pieces of 1, 2, 5 and 10 macutes, the silver macute being worth about 4½d. sterling. The account given by Montesquieu (quot. 1748), and adopted by Mill and other English writers on political economy, appears to be based on misapprehension.

† Madame (madam; often mæd'm, or anglicized mæd'm). Also madam. Pl. MESDAMES; † madames. [Fr.: see MADAM sb.]

The uses in which the word is meant to represent a foreign title are treated in the present article, although in early examples the spelling is often madam. For madame, when it is a mere variant spelling of the Eng. word, see MADAM.]

1. The title prefixed to the surname of a French married woman (corresponding to the Eng. 'Mrs.', 'Lady', etc., according to degree of rank). Abbreviated Mme.; in Eng. books and newspapers Mme. often occurs.

In English use it is very commonly applied to a married woman belonging to any foreign nation (substituted, e.g., for the Ger. Frau or the Du. Mevrouw). It is also frequently assumed (instead of 'Mrs.') by English or American professional singers or musicians, and by women engaged in businesses such as dressmaking, in which native taste or skill is reputed to be inferior to that of Frenchwomen.

Madreporae (mæ'drēpor-ē). [ad. mod.L. *madrepora* or *F. madrepora* (1710), ad. It. *madrepora*.

The Italian naturalist Ferrante Imperato (*Hist. Nat.*, 1599) uses *pora* as a name for 'a kind of vegetable the substance of which resembles that of coral, but differs in being porous'. He evidently regarded this word as identical with the ordinary It. *pora*, ad. L. *porus* Pore sb.; but perh. it really represented late L. *porus*, a. Gr. *poros* calcareous stone, stalactite. Among the species of 'pora' he enumerates *millepora*, *frondifera*, and 'those plants by some called madreporae (here *madripore*, but elsewhere *madrepora* occurs), which are tubular growths, issuing from a common stem, and attached together at their roots, so that they resemble a honeycomb'. The word *madrepora* (which Imperato app. did not invent) seems to be f. *madre* mother + *pora*, the ending of the latter being changed to suit the gender of the sb. prefixed in apposition; in this view, the other words, *millepora*, *frondifera*, etc., must have been formed later in imitation of *madrepora*. A comparison of Imperato's woodcut of the 'madreporae' with those of the other species of *pora* seems to suggest that the prefix 'mother' may refer to the appearance of prolific growth characteristic of this 'plant'. 1. Formerly applied loosely to most or all of the perforate corals (which, however, were not originally classed as corals); now usually in more restricted use, a polypoidum of the genus *Madrepora* (or family *Madreporidae*).

Mael(e), *Sc. form* of *MOLE* (spot).

Maelstrom (mæ'lstrom). Also 7 [male-strand,] male stream, 8 maelstrom, 9 maelström, and in Ger. form mahlstrom, [a. early mod. Du. *maelstrom* (now *maelstrom*), whirlpool, f. *malen* to grind, also to whirl round + *strom* stream.

The use of *maelstrom* as a proper name (also in Fr.) seems to come from Du. maps, e.g. that in Mercator's *Atlas* (1595). Dutch philologists are of opinion that the word is native. It is true that it is found in all the mod. Scandinavian languages as a common noun, but it is purely literary; and Danish scholars regard it as adopted from Du. or LG. The earliest known instance of *Da. maelström* (formerly also written *maelström*) occurs in 1673 in Debes *Færa reserata*, the author of which was a pastor in the Færie Islands, Cf. Norw. dial. *maelstrum* (admitted by Aasen to be 'little used'), which prob. means that he had never heard it in actual popular use, Sw. *maelström*, *Færoic mahlströymur* (Hammershaimb *Færsk Antholog.* Glossary, the vb. *mala* in Færoic means 'to grind', 'to whirl round').

The form *Maelstrand* in quot. 1750 can only be a blunder; probably Jenkinson hearing the name *Maelström* confused it with the name of Maelstrand (meaning 'pebbly shore', now Marstrand, in South Sweden.)

In the mod. Rom. langs. the place of the word is taken by the cognate F. *magie*, It. *Sp.*, Pg. *magia*, ad. med. L. *magia*, a. Gr. μαγία f. μάγος MAGUS.]

1. The pretended art of influencing the course of events, and of producing marvellous physical phenomena, by processes supposed to owe their efficacy to their power of compelling the intervention of spiritual beings, or of bringing into operation some occult controlling principle of nature; sorcery, witchcraft. Also, the practice of this art.

The 'magic' which made use of the invocation of evil or doubtful spirits was of course always regarded as sinful; but *natural magic*, i. e. that which did not involve recourse to the agency of personal spirits, was in the Middle Ages usually recognized as a legitimate department of study and practice, so long as it was not employed for malicious ends. Of 'natural magic' as understood by mediæval writers, typical examples are the making of an image, under certain astrological conditions, in order to injure or benefit the health of the person represented; and the application of a medication to a weapon in order to heal the wound made by it. These things, if now practised, would still be called 'magic', though the qualification 'natural' would seem quite inappropriate. On the other hand, the 'natural magic' of the Middle Ages included much that from the standpoint of modern science is 'natural', but not 'magical', the processes resorted to being really, according to the now known laws of physical causation, adapted to produce the intended effects.

Magnanimity (mæ'gnānīmī-ti). [*a. f. magnanimitas*, ad. *L. magnanimitas* -em, *f. magnanimus* MAGNANIMOUS.]

† 1. Used (with somewhat vague meaning) as the name of one of the virtues recognized in mediæval ethics. *Obs.*

Primarily this represented the Aristotelian μεγαλοψυχία (see 3), but in scholastic descriptions the notion was modified in accordance with Christian ideals, and blended with elements suggested by the etymology of the *L.* word (*animus* being capable of the sense 'courage'); hence 'magnanimity' is often classed as a subdivision of 'fortitude' (so Aquinas, following Macrobius *In Somn. Scip.* I. viii. § 7).

3. In the Aristotelian sense of μεγαλοψυχία (see below). Also, loftiness of thought or purpose; grandeur of design, nobly ambitious spirit. Now *rare*.

In Aristotle the word (by modern translators rendered 'great-souledness', 'high-mindedness') expresses the attitude of one who, rightly conscious of his own great merits, is indifferent to praise except from those whose approval is valuable, regards the chances of fortune with equanimity, and, while ready to confer benefits, will seldom condescend to accept them.

It is not clear which of these two senses gave rise to the alchemical use; the brilliant lustre ascribed by the alchemists to 'magnesia' favours the latter view, and the substance seems not to have been identified with the loadstone, in spite of the resemblance of its name to the familiar word *Magnes*.]

† *2. = MANGANESE I.* Also *black magnesia. Obs.* [This use prob. arose from the notion that manganese was a form of the 'magnesia' of alchemy. There may, however, have been some earlier confusion of manganese with loadstone: Pliny *N. H.* xxxvi. lxvi says that loadstone (*magnes lapis*) was used in making glass. In the Latin of early chemistry the word was applied to various other substances: e.g. *magnesia opalina* was a red sulphide of antimony (see KERNES 3). 1677 PIOT *Oxfordsh.* 79 Magnesia (In the Glass-house, called Manganese). 1712 v. See Manganese.

3. (In early use often *† white magnesia* = mod. *L. magnesia alba*, in contradistinction to *black magnesia*: see 2.) a. Originally, and still in popular language, applied to hydrated magnesium carbonate, a white earthy powder, used in medicine as an antacid and cathartic. *Calcin'd magnesia*: magnesium oxide (pure 'magnesia': see b) prepared by heating the carbonate. b. In modern Chemistry, an alkaline earth, now recognized as the oxide of magnesium (MgO).

[This application of the word seems not to be connected with the use in sense 1, but to have been suggested by the mod. *L. magnes carnes* 'flesh-magnet', applied c. 1550 by Cardan (*De Subtilitate* vii, Opera III. 475) to a white earth resembling osteocolla, because it was found to adhere strongly to the lips, and was therefore supposed to have the same attraction for flesh that the loadstone has for iron. Davy in 1807 and first successfully separated by Bussy in 1830, as a light silvery metal, ductile and malleable, which is stable in dry air but tarnishes when exposed to moisture, and burns with a blinding white light when held in a flame. Symbol Mg.

2. A piece of loadstone; also, a piece of iron or steel to which the characteristic properties of loadstone have been imparted, either permanently or temporarily, by contact with another magnet, by induction, or by means of an electric current. A magnet has an axis, at the extremities of which (the 'poles') the attractive power is greatest, and at the middle of which it becomes *nil*. When suspended freely, a magnet assumes such a position that one of its poles (hence called the north pole) points approximately north, and the other (the south pole) approximately south; the like poles of two magnets repel each other, while the unlike poles attract each other.

Magneto-electric, *a.* Pertaining to electric phenomena involving electric currents induced in conductors by the relative motion of these conductors with respect to either permanent magnets or electro-magnets.

Introduced, in 1831, by Faraday, who employed it in its most general sense for describing the currents induced by motion of conduction in conjunction with any of the following kinds of magnet: permanent steel magnets, ordinary loadstones, electro-magnets, the earth. He used it tentatively at first in contradistinction to the term *volta-electric*, which he applied to the induction of electricity by turning on or turning off an electric current in a stationary coil.

1831 FARADAY in *Phil. Trans.* (1832) CXXII. 139 As a distinction in language is still necessary, I propose to call the agency thus exerted by ordinary magnets, *magneto-electric* or *magneto-electric induction*. *Ibid.* 173 Upon the supposition that the rotation of the earth tended, by magneto-electric induction, to cause currents in its own mass. 1833 *Ibid.* CXXIII. 44 I had the pleasure... of making an experiment, for which the great magnet [a loadstone] in the museum... and the magneto-electric coil described in my first paper, were put in requisition. 1834 — in *Philos. Mag.* V. 349 When I first obtained the magneto-electric spark it was by the use of a secondary magnet... My principal was an electromagnet; Nobil's was, I believe, an ordinary magnet; others have used the natural magnet. 1839 J. F. DANIELL *Intrad. Chem. Philos.* 489 Magneto-electric is the converse to electro-magnetic induction. 1854 G. BIRD & C. BROOKE *Elemt. Nat. Philos.* xvii. (ed. 4) 421 note. Similarly, electro-magnetic induction would mean the development of magnetism by a current, and magneto-electric induction, that of a current by magnetism. 1881 MAXWELL *Electr. & Magn.* II. 208 This is the electromotive force which must be supplied from sources independent of magneto-electric induction.

b. **Magneto-electric current**. Used by Faraday to distinguish currents generated mechanically by magneto-electric induction from those generated in a voltaic battery.

1854 FARADAY in *Phil. Trans.* CXLII. (1852) 137 On the employment of the Induced Magneto-electric Current as a test and measure of Magnetic Forces.

c. **Magneto-electric machine**. First used by Faraday, in 1831, to denote a machine generating currents by magneto-electric induction. By later writers employed in variously limited senses.

The appellation continued to be used in Faraday's wide sense by various writers down to about 1867, when the improvements of Wilde, Wheatstone, Siemens, Ladd, Varley and others attracted much attention, and the term 'dynamo-electric machine' was introduced by Brooke. This term was defined by Brooke himself to denote in general a machine

'in which dynamic energy is employed to produce an electric current' (*Proc. Roy. Soc.* XV. 499, *footnote*); by others, however, it has been applied to signify only such machines as embodied the principle of self-excitation and did not contain any permanent magnets. Those who adopted the latter usage limited the meaning of 'magneto-electric machine'; some including under that term only the machines with permanent magnets of steel, while others included under the name both these and the machines with separately-excited electro-magnets. The present tendency is to confine the term strictly to the machines with permanent steel magnets. Some writers define magneto-electric machines as simply old-fashioned or rudimentary kinds of dynamos; others treat the terms as synonymous. On the other hand some writers treat 'magneto-electric machine' as a generic term, of which dynamo-electric machines form a sub-class.

1831 FARADAY in *Phil. Trans.* (1832) CXXII. 160 Two rough trials were made with the intention of constructing magneto-electric machines. *Ibid.* 163 [Under heading *Terrestrial Magneto-electric Induction*, describes as magneto-electric machines discs of copper caused to revolve, and thereby generate electric currents under the magnetic influence of the earth.] 1866 CROOKES in *Q. J. Nat. Sci.* XII. 504 Magneto-electric machines, with revolving armatures, in which electro-magnets had been substituted for permanent magnets, had been constructed. 1867 WHEATSTONE in *Proc. Roy. Soc.* XV. 369 The magneto-electric machines which have been hitherto described are actuated either by a permanent magnet or by an electro-magnet. 1878 *Proc. Inst. Civ. Engin.* LII. 63 M. Alfred Naudet remarked that he did not agree with... the distinction between dynamo-electric and magneto-electric machines. In all these instruments mechanical power was converted into electricity by the action of magnetism; consequently all were both magneto-electric and dynamo-electric. 1878 J. N. SHOOLBRED *Pres. State Electric Lighting* 6 For the older form, where permanent magnets are employed, the term 'magneto-electric' machine has been retained. 1880 A. SIEMENS in *Phil. Soc. Trans.* Engin. IX. 93 A constant and permanent magnetic field is, therefore, of paramount importance, and it can be produced in the way proposed by Mr. Wilde in 1863 for magneto-electric machines by employing a separate machine for exciting the field-magnets of one or more similar machines. 1882 S. P. THOMPSON in *Phil. Soc. Arts* XXXI. 120 The arbitrary distinction between so-called magneto-electric machines and dynamo-electric machines fails when examined carefully. In all these machines a magnet, whether permanently excited, independently excited, or self-excited, is employed to provide a field of magnetic force. And in all of them dynamic power is employed. 1887 W. B. ESSON *Magneto- & Dynamo-electric Machines* 22 In all the machines yet described, the electric currents were induced by means of steel magnets, or, as in Wilde's machine, by magnets that were magnetised by the current produced in another machine. Such machines are usually called 'magneto-electric' machines, to distinguish them from the 'dynamo-electric' machines. 1889 *Chambers's Encycl.* IV. 146/1 The term 'dynamo-electric' was at first applied to distinguish those machines which were self-exciting from 'magneto-electric' machines, which had permanent magnets to give the field; but this distinction is no longer maintained. 1891 J. W. URQUHART *Dynamo-Construct.* 2 A magneto-electric machine—an apparatus in which steel magnets are used to furnish the 'magnetic field'—is not strictly by common consent called a dynamo.

So **Magneto-electrical** *a.*, in the same sense.

JENKIN *Electr. & Magn.* xx. § 1. 280 It is convenient to retain the name magneto-electrical apparatus for those arrangements in which powerful electric currents are induced in wires moved across a magnetic field produced by permanent magnets or electro-magnets.

Main (mē'n), sb.³ Also 6-7 maine, mayne. [Of obscure history.

From the early use in antithesis with *by* (which seems in the game of hazard to have meant the same as *chance* to the

later language) the word would appear to be an absolute or elliptical application of MAIN a. (Cf. MAIN CHANCE.) The usual view that the word is a F. main 'band' has no evidence; quot. c.1685-8 in sense 3 prob. embodies a mere etymological speculation.]

1. In the game of hazard, a number (from five to nine inclusive) called by the 'caster' before the dice are thrown.

'If he "throws in," or "nicks," he wins the sum played for from the banker or "setter"... If the caster "throws out" by throwing aces, or deuce, ace (called crabs), he loses... If the caster neither nicks nor throws out, the number thrown is his "chance," and he keeps on throwing till either the chance comes up, when he wins, or till the main comes up, when he loses' (*Encycl. Brit.* s.v. *Hazard*).

Main (mē'n), a. Forms: [1 mēgen-], 3 mēin, 4-7 mayn, 5 Sc. mane, 5-7 mayne, 6-7 maine, maigne, 5- main. [Prob. partly repr. OE. mēgen- (MAIN sb.¹) in compounds, and partly an adoption of the cognate ON. mēgen, mēgn adj., strong, powerful; in some uses (e.g. in MAIN SEA = ON. mēgenstōr) it seems to represent ON. mēgen- (= MAIN sb.¹) in compounds.

It is doubtful whether the development of the Eng. word owes anything to the influence of OF. *maine*, *maigne* great—L. *maignus*. The OFr. word is purely poetical, and occurs chiefly as an epithet of kings and nobles; it may prob. have influenced the use of *main* by ME. poets, but the only unequivocal evidence of its adoption is the 15th c. Sc. *Alexander the maine*, *Charlis the maine* (see MAIN a. 1).

9. *Cap (or + hat) of maintenance*: a kind of hat or cap formerly worn as a symbol of official dignity or high rank, or carried before a sovereign or a high dignitary in processions.

The sense of maintenance here is obscure. Cf. the app. equivalent *cap of estate*, *cap of dignity* (see CAP sb. 4 f). In the earliest example (c 1485) the *hat of maintenance* is worn by the members of the Holborn Quest. Afterwards the *cap of maintenance* is mentioned by contemporaries as having been given by the Pope thrice to Henry VII and once to Henry VIII; in 1551 it is referred to as one of the insignia of a prince. In the 17th c. and later it appears chiefly as borne, together with the sword, before the Lord Mayor, and before the Sovereign at his coronation. A kind of cap, with two points like horns behind, borne in the arms of certain families either as a charge or in the place of a wreath, is described by heralds as a 'cap of maintenance': cf. quot. 1700.

2. Preceded by a possessive, *your, his, her, the king's, the queen's*; sometimes with a qualifying epithet, as (*most*) *sacred, gracious, royal*. Used as an honorific title in speaking to or of a king, queen, emperor, or empress. In this use *Your Majesty* is a respectful substitute for the pronoun *you*, and *His, Her Majesty* (abbreviated H.M.) may be either prefixed to such designations as *the King, the Queen, King Edward VII.*, etc., or substituted for them; so, in modern use, *Their Majesties*, when more than one royal person is meant. Also, with distinguishing epithet: *His, Her Imperial Majesty* (abbreviated H.I.M.), said of an emperor or empress; *His Britannic Majesty* (abbreviated H.B.M.), the King of Great Britain (and Ireland); *His Catholic Majesty*, the King of Spain; *His Most Christian Majesty* (Hist.), the King of France; in jocular language, *His Salutic Majesty*, the Devil, Satan.

This use, common to all the Rom. langs., and from then adopted into all the living Teut. langs., descends from the Latin of the later Roman empire (*tua, vestra majestas*). In England it occurs, in its Latin form, from the 14th, though examples of the vernacular form are not met with before the 15th c. It was not until the 17th c. that *your majesty* entirely superseded the other customary forms of address to the sovereign. Henry VIII and Queen Elizabeth were often addressed as 'Your Grace' and 'Your Highness', and the latter alternates with 'Your Majesty' in the dedication of the Bible of 1611 to James I.

The English syntax of this word (as of the other abstract nouns similarly employed as titles, e.g. *highness, lordship, grace, excellency*) is somewhat inconsistent. Although *Your Majesty*, like *His, Her Majesty*, requires the following verb to be in the 3rd person sing. to agree with the title, this principle of concord is not applied to the pronouns, as in Fr. and some other langs. The neuter pronouns *it, which*, cannot be used with reference to a foregoing (*Your, His, Her Majesty*); either the titular phrase must be repeated, or the pronoun must be the same as if the simple form ('you', or 'the king', 'the queen') had been used instead of the periphrastic form.

The mod. usage is difficult to reduce to rule. It is common to speak of 'making' a sonnet or an epigram; but it would sound odd to speak of 'making' a tragedy or a novel, except with some added phrase, as in 'Some one has made a tragedy on this subject'.

Aleppo* [262 A cutaneous disease... has acquired the name of *il mal d'Alep* or *Aleppe evil*.] 264 The third kind of Mal... begins like the two others, but [etc.].

Mal- (mæl), prefix, formerly often written male- (but pronounced as one syll.), chiefly represents the F. *mal* adv. = L. *male* ill, badly; rarely, as in *mal talent*, it represents the OF. *mal* adj. = L. *malus* bad. In its advb. use the prefix occurs in many adoptions from Fr., which are sometimes combinations with vbs., as *maltrait*; sometimes nouns of action formed from such combinations, as *malfeasance*; and sometimes combinations with adjs., where the prefix serves to reverse the favourable connotation of the word, as *mal adroit*, *malcontent*. In imitation of these adopted words, *mal-* has from the 16th c. been prefixed to many Eng. words, to convey the sense 'wrong', 'improper (ly)'. The words thus modified are chiefly nouns of action, as in *malpractice*, and many physiological terms, as *malassimilation*, and *malformation*; occasionally adjs. and vbs., as in *malodorous*, *malappropiate*. The formations that have a permanent character are treated in the alphabetical places; examples of the frequent use of the prefix in the creation of nonce-words are *mal-accident*, *-application*, *-appointment*, *-auxiliary*.

Both the authors cited are Italian, and in 1486 Simon a Cordo (*Clavis Sanationis*) explains the word as a diminutive of *il. melica* millet, remarking that the grains resemble those of millet. This seems probable; but if the word be of European origin, it has either been adopted in a corrupt form into some West African langs., or confused with a native word, the source of the earliest Eng. form and of the *F. maniguette*. g. Law. a. Wrongful intention generally.
b. That kind of evil intent which constitutes the aggravation of guilt distinctive of certain offences (esp. of murder), or which deprives some act, on the face of it unlawful, of a justification or excuse that might otherwise have been allowed.

The first meaning mentioned under b was originally expressed by the A.F. phrase *malice prepense* or *prepenze*, which in modern legal language appears as *malice prepense* (see PREPENSE a.) and in the translated form *malice aforethought*. In early use the phrase occurs in many anglicized forms: *malice prepened*, *prepened*, *prepened*, *prepened*, *prepened*, *malice*; occasional variants found in non-technical writers are *malice prepenze* (17th c.), *malice prepenzie* (Fielding), *malice prepened* (Charles Lamb). For examples see the various adjs.

See also quot. 1825-1901 below, and quot. 1889 s.v. MALICIOUSLY 4. It is not possible to frame any such general definition as would show what legally constitutes 'malice' or proof of 'malice' in particular kinds of cases.

It certainly has different meanings with respect to responsibility for civil wrongs and responsibility for crime. 1901 SIR F. POLLOCK *Law of Torts* (ed. 6) 24 Such abuse of privilege allowed by law on special occasions and for special purposes, where the act is done not in good faith or for the advancement of justice, but from evil motives such as personal enmity is called 'malice' or 'express malice', and deprives the act of justification. . . The words 'malice', 'malicious', and 'maliciously' were formerly used in pleading, and thence in forensic and judicial language, in many places where they were superfluous.

Mammon (mæ'mən). Also 4, 6 Mammona, 6 mammonde, mammony. [a. late L. *ma(m)-mōnia* m. (Vulg.), *ma(m)mon* (Diefenb.), a. Gr. (N.T.) μαμωνάς (late texts μαμμωνάς), a. Aramaic ממונה *māmōnā*, ממונה *māmōnā* riches, gain (frequent in the Targums). Hence also Syriac *māmōnā*, Goth. *mammonia* wk. masc., mod. F. *mammon*, *mammonne*. The N. T. phrase μαμωνάς τῆς ἀδικίας (Eng. version 'mammon of unrighteousness'; earlier versions, 'mammon of iniquity', 'wicked mammon', etc.) represents exactly the Aramaic *māmōn di-shaas*, 'riches or gain of wickedness' (Targ. Hab. ii. 9), and approximately the more common *māmōn di-sh'gar*, 'riches of falsehood'.]

1. The Aramaic word for 'riches', occurring in the Greek text of Matt. vi. 24 and Luke xvi. 9-13, and retained in the Vulgate. Owing to the quasi-personification in these passages, the word was taken by mediæval writers as the proper name of the devil of covetousness. This use appears in English in the 14-16th c., and was revived by Milton (*P. L.* i. 678, ii. 228). The word does not occur in the N. T. translations of Wyclif and Purvey (who substitute *richess*), but it was used by Tindale (1526-34) and subsequent translators, with the exception of those of the Geneva version. From the 16th c. onwards it has been current in English, usually with more or less of personification, as a term of opprobrium for wealth regarded as an idol or as an evil influence.

Text: OE. *manu*, *manu* (pl. and dat. sing. *manu*), also rarely *manua* wk. masc., corresponds to OFris. *man*, *mon*, OS. *man* (inflected *mannu*, pl. *man*), Du. *man* (pl. in MDu. *manne*, *man*, in mod. Du. *mannen*, rarely *mans*), OHG. *man* sing. and pl. (MHG. *mann* sing. and pl., mod. G. *mann*, pl. *männer*), ON. *maðr*, rarely *mannr*, acc. *mann*, genitive *manns*, pl. *menn*, rarely *mör*, *mör* (Sw. *man*, pl. *män*, Da. *mand*, pl. *mænd*), Goth. *manna*, acc. *mannans*, genit. *manis*, pl. *mans*, *mannans*. The forms in the various Teut. langs. belong to two declensional stems, the O'Fut. forms of which would be **mannun* and **mannon*-. (The ON. *man* str. neut., slave, may possibly be related, but the connexion is doubtful.) The OE. plural *mann* is the regular descendant of O'Fut. **mannis*, and the dative *manu* of O'Fut. **manni*, from the cons.-stem **mannu*-. It was formerly regarded as certain (on the ground of the supposed correspondence with Skr. *manu* man) that the *nu* of **mannu* was derived from an original *nno*. The now prevailing view is that the second *n* represents the zero-grade of the suffix of a stem of which the Gothic form would be **manan*. This hypothesis accounts for the otherwise obscure form *manua* which the word assumes in Gothic compounds; if it be correct, the Teut. word and the Skr. *manu* cannot have any nearer relation than that of independent derivatives of a common root. They have been usually referred to the Indogermanic **men*-, **man*-, to think (see *Mno* sb.), so that the primary meaning of the sb. would refer to intelligence as the distinctive characteristic of human beings as contrasted with brutes. Many scholars, however, regard this as intrinsically unlikely to have been the original sense, though no plausible alternative explanation has been suggested.

In all the Teut. langs. the word had the twofold sense of 'human being' and 'adult male human being', though exc. in Eng. it has been mainly preserved in the former sense by a derivative (Ger. Du. *mensch*, Sw. *meniska*, Da. *meneske*: cf. MANNISH sb.).

I. 1. A human being (irrespective of sex or age); = L. *homo*. In OE. the prevailing sense.

† a. In many OE. instances, and in a few of later date, used explicitly as a designation equally applicable to either sex. Obs.

In OE. the words distinctive of sex were *wer* and *wif*, *werþman* and *wifþman*.

b. In the surviving use, the sense 'person' occurs only in general or indefinite applications (e.g. with adjs. like *every*, *any*, *no*, and often in the plural, esp. with *all*, *any*, *some*, *many*, *few*, etc.); in modern apprehension *man* as thus used primarily denotes the male sex, though by implication referring also to women.

The gradual development of the use of the unambiguous synonyms *body*, *person*, *one*, and (for the plural) *folks*, *people*, has greatly narrowed the currency of *man* in this sense; it is now literary and proverbial rather than colloquial.

2. In abstract or generic sense, without article: The human creature regarded abstractly, and personified as an individual; human beings collectively; the human race or species; mankind. In *Zoology*: The human creature or race viewed as a genus (*Homo*) in the present classification consisting of only one species, *H. sapiens* of animals.

In OE. a few examples occur with the definite article. The Eng. use of the word as a quasi-proper name, without article, differs from the practice of most of the modern European langs. (cf. F. *l'homme*, G. *der mensch*), and from the usage of Eng. itself with regard to other generic names of animals: cf. 'the anatomical structure of man and that of the lion'.

It was afterwards extended by their opponents to the party who supported those leaders on other questions of policy. Also, in *Manchester policy*, etc., used derivatively to designate a policy of laissez-faire and self-interest.

At Rouen, a ring-shaped cake of bread (in ordinary Fr. called *couronne*) is known as *manchette*, lit. 'cuff' (Robin *Patois normand*, and Littré *Suppl.*), but this name (which may be of recent origin) is obviously descriptive of shape, while the Eng. word in early use denotes a certain quality of

bread. The identity of sense with PAINOEMAINE, DEMAINE, *maine*-bread (see MAINE sb.) suggests the possibility of etymological connexion with those words. The word might represent an AF. diminutive f. *demenche* = L. *dominica*, or it might be an Eng. compound f. MAINE sb. + CHEAT sb.; but either supposition involves some difficulties.]

1756 P. BROWNE *Jamaica* 177 There is a mixture made and used in some of our colonies called Mandram, . . . which seldom fails to provoke an appetite in the most languid stomachs. 1. A black mineral (now recognized as an oxide of a metal, to which its name has been transferred: see sense 2), used from ancient times in glass-making, and now in many industrial processes. Also called black manganese, + *glass-maker's manganese*. The name has been also applied with qualification to other ores of the metal: grey m., = MANGANITE 1; horn m., *corneous m.* [G. *hornmangan*, Jasche], an impure manganese silicate akin to phosphenite; red m., = RODOCHROSITE; white m., manganese carbonate.

As the name is in chemical use now restricted to the metal (sense 2), its older application survives only in commercial and industrial use. The black manganese of commerce is usually a mixture of various oxides, but the term is considered to apply esp. to manganese dioxide, MnO₂, which is the valuable ingredient in the mixture.

The corrupt form *mangelwurzel* (in Eng. now the prevailing form) suggested, or was suggested by, a pseudo-etymological association with *G. mangel* *want*, whence, in the 18th and early 19th c. the name was often mistranslated 'root of scarcity' (and in *F. racine de disette*). The origin of *G. mangold* (MHG. *mangolt*) has not been determined: it may be an application of the OHG. personal name *Managolt*. The *G.* word has passed into other langs.: cf. *Da. mangold*, *It. mangoldo*.

Mangrove (mæ'ngrov). Also 7 mangrove, mangrave. [Of obscure history. Synonymous words app. connected are Pg. *mangue* (16th c.), Sp. *mangle* (Oviedo 1535, who applies it to *S. American* species), whence F. *manglé* (16th c.), later *mangle* (now applied to the fruit only, the name of the tree being *manglier*). The Malay *manggi-mangi* mangrove (not now current in the Malay Peninsula, but recorded in early Dicts.) is usually regarded as the ultimate source, but it is difficult to account on this view for the early appearance of Sp. *mangle* referring to America. The Eng. forms *mangrove*, -grave are unexplained (but cf. the word-play in quot. 1613); the mod. form is doubtless due to assimilation to GROVE sb.]

1. Any tree or shrub of the genus *Rhizophora*,

or the allied genus *Bruguiera* (N. O. *Rhizophoraceæ*); esp. the Common Mangrove, *R. Mangle*.

The genus *Rhizophora* is extensively represented in both hemispheres. The species are all tropical, growing in the mud on the sea-shore down to low-water-mark; they have large masses of interlacing roots above ground, which intercept mud and weeds, and thus cause the land to encroach on the sea. *Red mangrove* (see also 2 d) a name given to a West Indian variety of the Common Mangrove, formerly separated as *R. Candel*; also in Australia, to *Bruguiera* *redii*.

1613 W. C. Plain *Descr. Bermudas* F 2 b. Amongst all the rest there grows a kind of tree called Mangroves, they grow very strangely, & would make a man wonder to see the manner of their growing. 1659 R. LIGON *Barbados* 72 The mangrove is a tree of such note as she must not be forgotten. 1697 DAMPIER *Voy.* i. 151 Low swampy Land, overgrown with Red Mangroves. 1772-84 COOK's *Voy.* (1790) I. 193 A large lagoon, by the sides of which grows the true mangrove, such as is found in the West-Indies. 1845 DARWIN *Voy. Nat.* xxi. 408 The channel... was bordered on each side by mangroves, which sprang like a miniature forest out of the greasy mud-banks. 1886 MAIDEN *Usef. Native Plants* 316 *Bruguiera Rheedii*. Red Mangrove.

†Ligon's description of the 'mangrove' confuses it (as Sloane pointed out) with the Mahoe (see MAHOE 1). Hence some later writers have applied the name mangrove-tree to the Mahoe.

2. Applied, on account of similarity of habit and appearance, to various other plants. a. Any tree or shrub of the genus *Avicennia* (N. O. *Verbenaceæ*), esp. the White Mangrove (*A. officinalis*) found in Brazil and Anstralsia, and the Black or Olive Mangrove (*A. nitida*) of tropical America and Africa. b. Button mangrove, a small W. African tree, *Conocarpus erectus* (N. O. *Combretaceæ*). Also called Zaragoza mangrove (*Treas. Bot.* 1866). c. White mangrove, *Laguncularia racemosa* (N. O. *Combretaceæ*), found in the West Indies. d. In Australasia (see Morris *Austral Eng.* 1898) used with various qualifications in the names of certain plants indigenous or cultivated there, as milky mangrove, *Excavaria Agallocha* (N. O. *Euphorbiaceæ*); native mangrove (in Tasmania), a leguminous tree, *Acacia longifolia*; red mangrove (see also 1), *Heritiera littoralis* (N. O. *Sterculiaceæ*); river mangrove, an East Indian tree, *Egiceras majus* (N. O. *Myrsinæ*), naturalized in Australia; rope mangrove, *Hibiscus arboreus*.

-mania, a terminal element, repr. Gr. *μαῖνία* MANIA in composition.

There were in Gr. a few compounds in -*mania* (rare and chiefly post-classical), expressing the general sense 'a certain kind of madness', or 'the state of being mad after some object', and corresponding as nouns of quality or condition to the related adjs. (a much more frequent formation) in -*μανής* = 'mad'. Examples are *γυναικομανία* mad passion for women, *ερωμανία* love-madness, *ιππομανία* mad love for horses, *υδρομανία* 'water-madness', hydrophobia. In the 16th and 17th c. a number of quasi-Greek compounds, denoting species of mania, were invented and used in medical Latin, and some of these, as *uymphomania*, have been adopted in Eng. Other technical or quasi-technical words, formed in the 19th c., are *kleptomania*, *hypemania*, *megalomania*. In the 17-18th c. the currency of F. *manie* in the sense of a 'craze' or passion (e.g. for some pursuit, or the collection of some class of objects) suggested the formation of a number of quasi-Gr. compounds such as *bibliomania* mania for books, *néfrotomania* mania for metre, *néfrotomanie*

mania for song; and hybrid formations such as *Anglomania* mania for things English, *tulipomania* mania for tulips. Several of these words have been adopted in Eng. with the ending *-mania*, and in the 19th c. it became somewhat common to invent nonce-words with this ending. Examples are *bancomania*, a craze for establishing banks; *Graio-mania* [L. *Graivus* Greek], passion for things Greek; *Italo-mania*, wild enthusiasm for Italy; *Queenomania*, (applied by Southey to the popular devotion to the cause of Queen Caroline); *scribbleomania*, a craze for scribbling. The sbs. in *-mania* have, actually or potentially, correlative sbs. in *-maniac*; the words in *-mane* are of rare occurrence, and are viewed as Gallicisms.

1788 Trifler No. 8. 104 'Till the wide Nudge-mania spread. 1792 COLERIDGE *Lett.* (1895) I. 35, I never had the scribble-mania stronger on me than for these last three or four days. 1815 [W. H. L. *manipul-us* handful, troop of soldiers, f. *manus* hand + **pl-*, weak form of root **ple-* to fill (as in *plenus* full).]

In med. L. *manipulus* was also used in sense 3 below. Henschel's Du Cange has several isolated instances in which *manipulus* and the related *manipula* seem to have meant 'something carried in the hand'; the latter is applied to a workman's tool (a trowel), a staff, an apron; the former is applied to a bowl of some kind. There are also instances of *manipulus*, *manipula*, in the sense 'servant'.]

(For a later interpretation of its symbolism see quot. c 1532).

The words used on putting on the maniple, 'Merear, Domine, portare manipulum fletus et doloris', look like a reminiscence of Ps. cxxviii. 6 (Vulg.) and it seems possible that the term may have originated from this formula. (So, as one of several suggestions, in Durandus *Rationale* 11, vi, *De Manipulo*; he explains 'manipulus' as = *prænum*.)
